

# MENKE INSPECTION STAMPS

## THE ACCEPTED STANDARD IN QUALITY CONTROL

Menke Marking has been manufacturing Inspection Stamps for over 50 years. Our stamps are specified and used by quality assurance professionals worldwide. All our stamps, whether traditional Pak-It, Self-Inking, Pre-Inked or steel, are manufactured to ensure consistent quality and long life. See what a difference dealing direct with a stamp manufacturer makes the next time you need inspection stamps. We guarantee your satisfaction.

## PAK-IT™ QUALITY FEATURES

**SNUG-FITTING METAL CAP  
WITH FELT PAD**

**HANDY HOLE**

**STURDY METAL CASE**

**DEEP CLEAR-CUT  
ENGRAVED DESIGN**

**SOLID RUBBER PLUG**

### TWO REASONS WHY PAK-IT™ IS BETTER

- 1** They're made using a more costly engraving process. Computerized engraving machines produce a deep, clear-cut design. You get a razor-sharp impression, even with the smallest, most intricate design.

- 2** They're made from a solid "plug" molded in durable neoprene rubber. Others may use a thin glued-on die. Our plug will stand up to most inks including alcohol-based and epoxy types. Result – long stamp life.

## STANDARD DESIGNS

Shown below are our most popular border designs. Substitute "OK", "INSP" or your company's initials in place of "MMD". Rearrange letters and numbers as needed. All standard designs can be made larger or smaller than these examples. Even reduced to half size, you can expect sharp impressions. Variations on these standards are no problem either (rectangles, upright ovals, etc.).

## SPECIAL DESIGNS

If one of our standard designs does not meet your needs, we can produce a unique design for you. Just submit a sketch or sample impression for a prompt quotation. A one-time pattern charge may apply. Keep your design simple! A symbol and number are most important. Overly complex designs make identification more difficult.

## SIMPLE ORDERING INSTRUCTIONS

1. Submit a sample impression of existing stamp or sketch the design you want.
2. Specify the case size or indicate the size by height of the impression. We've found that it's best if the case size size is specified; we'll create the proper impression size that fits. See following page for size examples.
3. Indicate numbering sequence required. Breaks in numbering sequence or random numbering do not effect quantity pricing as long as the design remains the same.

Your satisfaction is guaranteed!

# PAK-IT CASE & IMPRESSION SIZES

	<b>CASE NO.</b>	<b>CASE SIZE</b>	<b>IMPRESSION SIZE</b>	<b>SAMPLE IMPRESSIONS (APPROX ACTUAL SIZE)</b>			
<b>①</b>	<b>#1</b>	<b>3/4" .75" 19mm</b>	<b>5/8" .625" 16mm</b>				
<b>②</b>	<b>#2</b>	<b>5/8" .625" 16mm</b>	<b>1/2" .50" 12.7mm</b>				
<b>③</b>	<b>#3</b>	<b>1/2" .50" 12.7mm</b>	<b>3/8" .375" 9.5mm</b>				
<b>④</b>	<b>#4</b>	<b>3/8" .375" 9.5mm</b>	<b>1/4" .25" 6.4mm</b>
