

Zebra® Desktop Series

Menke offers the complete lineup of Zebra Desktop Printers for on-demand printing of labels, receipts and tags. Affordable in price, small in size – yet reliable, these printers are designed and built for low-to-mid volume labeling applications including shipping/receiving, inventory control, warehouse shelf tagging plus many others. Print all common bar code symbologies plus text, graphic elements and logos.

The exclusive Zebra OpenAccess™ design with the printhead mounted in the printer's top cover makes label loading a quick drop-in process. Print direct thermal or thermal transfer labels and tags in sizes up to 4-inch wide, plus many high performance thermal transfer materials (vinyl, polyester, polyimide, etc.) Choose from 2-inch or 4-inch models with standard or high resolution printheads. Zebra continues to be the technological leader in thermal printing. Let Menke Marking help you select the thermal printer, label design software package and media to print the label you need at a price to meet your budget.

Features common to all Zebra Desktop Printers:

- 4 inch-per-second print speed (2-inch-per-second for 3842 model)
- Direct thermal or thermal transfer print method
- Full 5-inch roll capacity or external fanfold stock
- All popular bar codes, linear and 2-dimensional
- Serial, parallel and USB interfaces
- Windows Drivers (Win 98, NT and XP)
- ZebraDesigner™ basic label design software

Options and Accessories:

- KDU+ for stand alone operation (see next page)
- Network connectivity
- Cutter
- Realtime clock
- Single label dispenser
- Advanced label print & design software from Zebra or Teklinx

"Stand Alone" Printing with a KDU Exclusively from Zebra®

With any one of Zebra's desktop printers and a Keyboard Display Unit (KDU) from Menke you can print labels on demand without the expense or inconvenience of an attached host computer. Quickly call up one of the label formats stored in the printer itself, change variable data with the KDU, then print as many labels or tags as needed – right on the spot! The compact printer goes wherever it's needed for label printing: production line, warehouse or office. Operators cannot make changes to any of the label's important features – font size, type of data, bar code, etc. – they enter only the variable data that you select. A computer is required only for the label design process. The Zebra-Designer software (included) is easy to use and allows you to place bar codes, text and logos on the label in the size and location you select. When done, simply download your label design to the printer. The KDU Plus features a full-size qwerty keyboard and a 4-line display. No power cord is needed; power is supplied from the printer itself.

TLP2844

LP/TLP 2844

Ideal for applications such as shipping and receiving, parcel delivery, warehouse management, retail, and healthcare, Zebra's space-saving LP/TLP 2844 printers are our most popular. Efficient and reliable for 4-inch-wide desktop labeling at a very affordable price. These simple-to-operate, low maintenance printers reduce operator training, operating costs and provide flexible solutions with a wide variety of options and accessories.

TLP2824

LP/TLP 2824

Great in retail for bar code and shelf labeling or medical labs for test tube labeling, the value-packed, ultra-compact LP/TLP 2824 printers redefine the 2-inch compact printer class. They fit into areas other printers can't, while they optimize productivity with a full 5-inch media capacity and a maximum print speed of 4 inches per second.

TLP3842

TLP 3842

The space-saving TLP 3842 desktop printer adds high-resolution print capability to Zebra's popular and proven Desktop series. The 300 DPI printhead on the printer produces high-quality, crisp, clear printing of two-dimensional bar codes, fine text, and complex graphics. This is the perfect low volume printer for the small labels needed in electronic component identification. Even very small fonts are legible and dense bar codes scan easily.

PRINT WIDTH	4.09"
PRINT SPEED	2 IPS
RESOLUTION	203 DPI
STD MEMORY	1 MB FLASH 512 KB SDRAM
