

LINCOLN T-FLEX® CODERS

QUALITY AND SERVICE

For more than 30 years Lincoln Coders has built a reputation for excellence in the carton coding industry. The T-Flex® coding system consists of a T-Flex® Coder, T-Flex® Rubber Type and a Porelon® Ink Roll. These dependable roller coders are the choice of thousands of companies the world over.

Featuring the best service in the industry, coders, parts, ink rolls - even custom type - are generally shipped from the factory within 24 hours.

INDEX CODER

Prints once on each carton in the same spot. Featuring Lincoln's patented cam and spring assembly - still unique in the industry. To "index" there must be a gap between each carton. Available in 3 standard models, prints up to 3/4" (19mm) characters.

RANDOM CODER

Prints continuously on each carton. Also prints on flat stock, web-fed materials, etc. Standard models print up to 3/4" (19mm) characters.

NP50-R NON-POROUS PRINTER

NON-POROUS APPLICATIONS

The NP50-R printer, with a quick drying ink system, has been developed specifically for use on non-porous surfaces such as plastic, metal, glass and most high-gloss or varnished surfaces.

As an economical alternative to high-maintenance ink-jet printers or costly offset printers, it is especially suited for continuous printing on web-fed rolls, flat metal or plastic sheets, etc. Use it to code lot numbers, heat numbers, production dates, etc.

The NP50-R uses a new long-lasting Poly Ink® roll which is completely enclosed to prevent evaporation. The ink is metered and evenly fed to the printing type via a unique transfer roller.

Print sizes from 1/8" to 1/2" (3.2mm to 12.7mm), type may be ordered in individual pieces (sorts) or multiple-character strips (logos).

As always, your order is on its way from the factory in 24 hours or less.

PRINT SIZES FOR T-FLEX® CODERS

Our most popular sizes are shown. Many other sizes and styles are available.

PORELON® INK ROLL

The "clean hands" way to code your product. No inky mess on your production lines. Porelon® rolls are available in a variety of sizes to fit any T-Flex coder.

For special inks, felt and foam rubber rolls are available. Also the new Long-lasting non-porous ink rolls for metal, glass, plastic, etc.

MOUNTING INFORMATION

Mounting is as easy as drilling a few holes. Specify left-hand, right-hand or top mount. Standard mounting bracket included - others available.
